The Problem:

Unsecured Sharing -

Emails and cloud drives have no granular access control; anyone can forward, download, or print sensitive documents

Deals Delayed -

Disorganised due diligence rooms slow down M&A timelines, frustrating buyers and destroying deal value

Unpredictable Costs -

Per-page billing models create cost overruns on large mandates

Legal Exposure -

Zero audit trail leaves firms vulnerable to post-closing litigation

How We Solve Them:

Clear, per-GB pricing

eliminates the cost unpredictability of per-page billing

Dedicated room manager per deal

A seamless extension of your transaction team

Granular access controls

Enforce role-based permissions controlling document distribution, download rights, and information access at every level of the deal structure

Built for India's Most Critical Transactions

www.dcirrus.com | contact@dcirrus.com

Investment Banking & Finance

M&A advisory, fundraising, IPO documentation

Legal & Advisory

Due diligence, contract management, litigation support

Pharmaceuticals & Healthcare

Simple, Intuitive Interface

No lengthy training required. Users log in and find everything they need -from day one.

Rapid Deployment

Your data room is live within minutes. Drag-and-drop setup with real-time index updates.

Institutional-grade security

256-bit AES, MFA, DRM, and device-level permissioning

Transparent per-GB pricing

zero billing surprises on high-document-volume mandates

Dedicated room manager, 24x7

acts as your deal team's operational arm

Deployment in minutes

deal room live before your first bidder NDA is signed

**Every Tool Your Transaction
Team Needs.**

One Secure Environment.

*Data Rooms built for Complexity,
designed for Simplicity.*

Granular permissions

folder and file-level access by bidder group, role, or NDA status

Timefox Intelligence

Real-time engagement analytics revealing counterparty document activity, depth, and duration to give your deal team a decisive informational advantage.

Full audit trail

Court-admissible logs of every user action, timestamp, and IP address

DRM-controlled downloads

Prohibit printing and copying; set auto-expiry on distributed files

Multi-Factor Authentication (MFA)

Via SMS, email, and Microsoft Authenticator for impregnable logins

Q&A Workflow

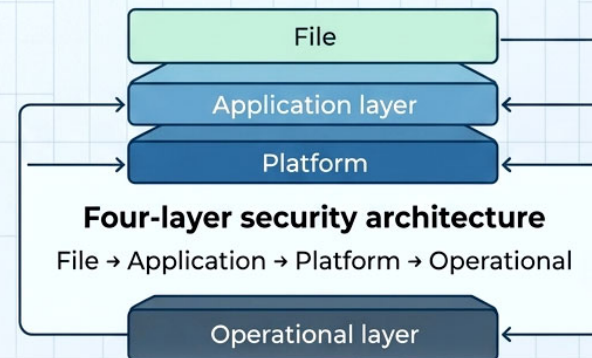

The Q&A allows to build a custom workflow and keeps information exchanged in a secure area of the data room.

IP Address Control

User-specific IP address login restrictions

Institutional Compliance. Zero Compromise.

Your Deal Record is Audit-Ready. From Day One.

Complete Compliance Archive

Secure download of all VDR files, version histories, and access logs.

Tamper-Proof Delivery

Provided on a complimentary, encrypted USB drive alongside a certified, date-stamped certificate of authenticity.

Legally Defensible Record

Robust, time-stamped audit trails to establish exactly who saw what document and when.

Post-Deal Litigation Support

Administrative backing to verify platform data integrity if challenged in court or by a regulatory agency.

**No Per-Page Billing.
No Surprise Invoices.
Ever.**
